

## WEDNESDAY 23 MARCH

17.00-18.30 (Auditorium 2)

### Satellite Symposium - Eli Lilly

#### Role of bone forming agents in the treatment of osteoporosis

- Bone quality: the case for anabolic therapy - E. Seeman
- Long-term side effects of Osteoporosis treatments - J. Stepan
- Use of Teriparatide in clinical practice: an update - D. Kendler

## THURSDAY MARCH 24

12.15-13.45 (Auditorium 1)

### Lunch Symposium – Rottapharm | Madaus

#### Biological plausibility and clinical relevance of the of the medical management of knee osteoarthritis with crystalline glucosamine sulfate - Chairman: E. Maheu

- The biological plausibility of the efficacy and safety of crystalline glucosamine sulfate in osteoarthritis - L.C. Rovati
- The need for Slow Acting Drugs in the management of knee osteoarthritis and how crystalline glucosamine sulfate satisfies these requirements - E. Maheu
- The true clinical relevance of crystalline glucosamine sulfate in the treatment of knee osteoarthritis - J-Y. Reginster

12.15-13.45 (Auditorium 2)

### Lunch Symposium – Pfizer

#### The evolving role of SERMs: changing perspectives in the clinical management of postmenopausal osteoporosis

- Introductions/Opening remarks - S. Palacios
- Are all SERMs created equal? The preclinical evidence
  - D. P. McDonnell
- From bench to bedside: the clinical profile of bazedoxifene
  - T. de Villiers
- The role of third-generation SERMs in the management of postmenopausal osteoporosis: translating data to practice
  - J. Calaf i Alsina
- Panel question & answer session/Closing remarks

17.00-18.30 (Auditorium 1)

### Satellite Symposium – Servier

#### Healthy bone: a question of structure

Chairmen: J. Cannata and R. Rizzoli

- Introduction - J. Cannata
- Improving bone health at the core - L.G. Ste-Marie
- Gaining bone strength with strontium ranelate - R. Rizzoli
- Protecting men and women from fracture - J.-Y. Reginster
- Repairing bones: strontium ranelate in fracture healing
  - J.-M. Feron
- Conclusion - R. Rizzoli

17.00-18.30 (Auditorium 2)

### Satellite Symposium – MSD

#### Emerging concepts in the management of osteoporosis: optimizing patient care

Chairman: A. Diez-Perez

- Welcome and opening remarks - A. Diez-Perez
- The effective management of osteoporosis; Focus on Vitamin D - C. Roux
- Odanacatib: 4 Years of clinical evidence in postmenopausal women - S. Papapoulos
- Update on osteoclast biology: identifying new targets for the treatment of osteoporosis - B. Boyce
- Panel discussion and Q&A

## FRIDAY MARCH 25

12.15-13.45 (Auditorium 1)

### Lunch Symposium – Amgen

#### Practical aspects in the treatment of osteoporosis

Chairmen: N. Guanabens & S. Papapoulos

- Osteoporosis treatment goals - A. Diez-Perez
- Fracture reduction throughout the skeleton: implications for patient care - C. Roux
- Long-term efficacy and safety with Denosumab
  - S. Papapoulos

12.15-13.45 (Auditorium 2)

### Lunch Symposium – Medtronic

#### Controversies in the treatment of vertebral compression fractures

Chairmen: S. Boonen & C. Bouza

- Impact of VCFs: Are they really devastating for the patients?
  - C. Cooper
- Current screening methods and pharmacological treatment: Are we doing the best we can? - C. Kasperk
- Minimally invasive surgery for VCFs: utopia or beneficial reality? - T. Blattert

## SATURDAY MARCH 26

12.15-13.45 (Auditorium 2)

### Lunch Symposium – Danone

#### Bone and musculoskeletal health during ageing: interplay of nutrition and exercise

Chairmen: R. Rizzoli & A. Diez-Perez

- Introduction - R. Rizzoli
- Bone and muscle function decline with ageing - C. Cooper
- Bone and muscle metabolism in response to dietary and physical activity interventions - L. Van Loon
- Optimal nutritional intakes for musculoskeletal health
  - B. Dawson-Hughes
- Conclusion - A. Diez-Perez
